EDUCATION

Bachelor in Computer Science

Pir Mehr Ali Shah Arid Agriculture University (PMAS)

08/2019 - 07/2023

CGPA 3.4

PERSONAL PROJECTS

PAINTDAILY.com (Final Year Project)

- A web-based Application developed in Reactjs and Java(SpringBoot).
- As a Team Leader, I play a significant role in the development and design process.
- The concept behind PaintDaily.com revolves around creating a fast and reliable web application that provides a unified platform for sellers and buyers. This platform allows them to purchase products based on buyer ratings and reviews.

E-wallet

- A web-based Application developed in Reactjs and Nodejs
- The e-wallet system establishes a virtual wallet for students, enabling them to make online payments for fees and other expenses instead of having to wait in bank queues.

Bank Management System

- A console based application developed in C++.
- The entire application was created by me.

WORK EXPERIENCE

Web Developer

Freelancer (indirect)

04/2022 - 08/2022

Achievements/Tasks

- Designed and developed complex and robust user interface using ReactJS.
- Worked on Third-Party API Integration include Stripe API
- Worked on ReactJS for building robust user interface and developed backend with NodeJS
- Worked on SQL and MYSQL for store and retrieve records
