## ABOUT ME

I'm a dedicated and passionate individual with a strong interest in technology and problem-solving. As a beginner React web developer, I'm excited to embark on a journey of creating innovative and user-friendly web applications. With a solid foundation in HTML, CSS, and JavaScript, I am constantly expanding my skills and knowledge to stay up-to-date with the latest trends in web development. I am a detail-oriented professional, committed to delivering high-quality code and continuously improving my abilities. Collaboration and teamwork are essential to me, and I thrive in environments that foster creativity and learning. I am eager to contribute my skills and work alongside experienced developers to create impactful and visually appealing web solutions.

## WORK EXPERIENCE

### Frontend Developer

**Inventico** [ Jul 2020 – Oct 2020 ]

**City:** Rawalpindi

**Country:** Pakistan

- Developed a school management system, facilitating efficient student information management, attendance tracking, and communication.
- Created a tutor website, enabling tutors to showcase their profiles, manage schedules, and connect with students.
- Collaborated on an Angular project, contributing to the development of a scalable web application with features like data visualization and user authentication.
- Worked closely with designers and backend developers to integrate frontend components, optimize performance, and enhance user experience.
- Conducted code reviews, and bug fixes, and implemented enhancements to improve functionality and maintainability.
- Utilized Git and Agile methodologies for effective project management and timely delivery.

### Video Editing

**Aubrey's Angel Ltd** [ Dec 2021 – Jun 2022 ]

**City:** London

**Country:** United Kingdom

- Worked as a video editor at Aubrey's Angel Ltd, responsible for editing and producing engaging video content for social media platforms and YouTube.
- Collaborated closely with the marketing team to understand project requirements and objectives, ensuring videos align with the brand's messaging and target audience.
- Edited raw footage, applied visual effects, transitions, and audio enhancements to create visually appealing and captivating videos

### Computer Science Teacher

**Iqra Huffaz Secondary School** [ Jul 2022 – Nov 2022 ]

**City:** Rawalpindi

**Country:** Pakistan

- Educated and mentored students as a Computer Science Teacher at Iqra Huffaz Secondary School, delivering engaging lessons and facilitating learning in various computer science concepts and programming languages.
- Conducted a seminar on frontend and backend development, providing insights into the fundamentals, best practices, and industry trends in web development.
- Led lab sessions for students, guiding them in the practical application of C language programming concepts, troubleshooting code, and fostering critical thinking skills.
- Designed and implemented effective lesson plans, leveraging multimedia resources and hands-on activities to enhance student understanding and engagement.
- Assessed student performance, provided constructive feedback, and tailored instructional approaches to cater to individual learning needs.
- Collaborated with colleagues and participated in professional development activities to stay updated with advancements in computer science education and pedagogical techniques.

## **EDUCATION AND TRAINING**

---

### **BSCS**

**PMAS ARID University Rawalpindi** [ 2019 – 2023 ]

**City:** Rawalpindi

**Country:** Pakistan

**Field(s) of study:** Computer Science

**Final grade:** CGPA: 3.4

- Introduction to Computer Science: Provides an overview of computer science principles and history.
- Programming Fundamentals: Covers basic programming concepts and logic.
- Data Structures and Algorithms: Explores advanced data structures and algorithm design.
- Database Management Systems: Introduces fundamental concepts of database systems and SQL querying.
- Object-Oriented Programming: Focuses on object-oriented concepts and software development.
- Operating Systems: Covers principles and components of modern operating systems.
- Computer Networks: Explores network architectures, protocols, and security.
- Software Engineering: Covers software development lifecycle and project management.
- Artificial Intelligence: Introduces principles and techniques of AI, including problem-solving and machine learning.
- Web Development: Provides an introduction to web technologies and application development.
- System Programming: Focuses on low-level programming and operating system internals.
- Information Security: Covers network security, cryptography, and secure coding practices.

### **WordPress**

**Digiskills.pk** [ 2020 ]

## **LANGUAGE SKILLS**

---

**Mother tongue(s):** Urdu | Pashtu

**Other language(s):** English

## **DIGITAL SKILLS**

---

Node Js / Next Js / Express Js / HTML / React Js / CSS / Angular / Vite / Three Js / MongoDB / Testing and Deployment / Video Editing / Bootstrap / WordPress / Audio Editing / SEO / Git / Github
